ABOUT OREOL ACADEMY

Established in 2017 as a location-independent Laser Proctology and Varicose Vein training center in Calicut, Kerala, Oreol Academy has grown into a global leader in minimally invasive medical training. It has trained over 10,000 surgeons from 63 countries, benefiting more than 2 million patients worldwide.

Today, Oreol stands as Asia's premier platform, seamlessly integrating online and offline resources to deliver advanced medical knowledge from developed nations to the region. Oreol has conducted training sessions in some of the most prestigious medical colleges, including Madras Medical College, Stanley Medical College, and Ambedkar Medical College. Recognizing the growing significance of minimally invasive and non-invasive techniques, Oreol Academy is dedicated to equipping surgeons with the skills needed for advanced surgical methods. Offering live sessions led by internationally acclaimed experts, the academy tailors its programs to the specific needs of doctors, minimizing travel and enhancing accessibility. With global accreditations and affiliations, Oreol provides international certifications and UGC-approved university courses in laser procedures.

Its hands-on training approach ensures personalized guidance, empowering surgeons to confidently perform procedures. Oreol's flexible online and offline training options cater to the evolving needs of healthcare professionals worldwide.

A CONCISE HISTORICAL **OVERVIEW**

Since 2017, Oreol Academy has empowered over 10,000 doctors from 63+ countries, offering diverse online and offline courses. Their programs focus on enhancing medical expertise, fostering global collaboration, and advancing healthcare practices across a wide range of specialties.

Proctology **Prefected..!!**

The Ultimate Laser Training Workshop

COURSE **OUTLINE**

This program begins with an introduction to the basics of Bioluminous Ai Laser Technology, including an overview of Laser machines & Accessories. Participants will learn about the history, physics & types of lasers, as well as the physics behind them. Following this, the focus shifts to anorectal anatomy, minimal invasive surgery, and the management of conditions such as hemorrhoids, anal fissures, and anal fistulas. Topics covered will include classification, etiopathogenesis, and both medical and surgical management options, including various laser techniques like laser hemorrhoidopexy, laser sphincterotomy, and laser ablation for pilonidal sinus.

The afternoon session will feature hands-on training, allowing participants to perform procedures such as laser hemorrhoidopexy, internal sphincterotomy, and fistula management techniques. The course also includes in-depth discussions on complications and their management for each procedure, ensuring a thorough understanding of potential challenges. Attendees will receive international certification upon successful completion, including a certificate, study materials, and access to training videos for future reference.

REVOLUTIONIZING ANORECTAL CARE

Clinical Solutions

For a Better Anorectal Care

The Technology

The Procedure

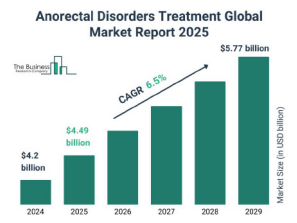

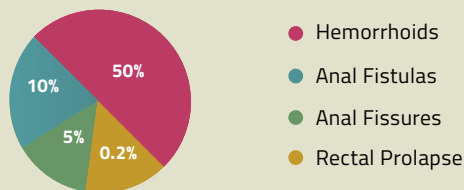

Piles, fistulas, and fissures are common anorectal conditions affecting millions worldwide. Piles (hemorrhoids) occur when veins in the anal or rectal area swell, causing itching, bleeding, and discomfort. Chronic constipation, pregnancy, and sedentary lifestyles increase risk. Anal fistulas, abnormal tunnels from the rectum to the skin near the anus, often result from untreated infections, causing pain and discharge. Anal fissures, small tears in the anal lining, cause sharp pain and bleeding. Early diagnosis and treatment prevent complications and improve quality of life.

Bioluminescent AI Laser technology is a transformative solution for treating piles, fistulas, and fissures. This minimally invasive technique uses precise laser wavelengths to target affected tissues, sealing blood vessels and nerves to reduce pain, bleeding, and infection risk. It accelerates healing and recovery, enabling quick resumption of daily activities, ensuring safer, more efficient, and comfortable proctological care.

The laser procedure for piles and fistula is minimally invasive. Under local or general anesthesia, a laser probe is inserted into the affected area. Controlled laser energy is applied to shrink piles or close fistula tracts. This seals blood vessels, reduces pain, and promotes healing with minimal bleeding and quick recovery.

Anorectal Disorders

They are quite common in the general population. Here are some estimates based on studies and available data

The anorectal treatment market is projected to grow from \$4.2 billion in 2024 to \$4.49 billion in 2025, driven by aging populations, lifestyle changes, increased awareness, and non-surgical treatments.

Efficacy

90%

Laser proctology is highly efficient, offering 90% above success rates.

Comfort

95%

Patients appreciated the maximum level of comfort

Satisfaction

95%

Patients would recommend this treatment to the others

COURSE FACULTY

Prof. Dr. Neeraj Goyal

Principal Consultant - General Surgery

Prof. Dr. Neeraj Goyal is a highly accomplished expert in Laser, Laparoscopic, and Robotic Surgery, with a distinguished career marked by numerous contributions to the medical field. He currently serves as the Director of Oreol Academy, NG 360 Academy and Le Crest Hospital in Ghaziabad, as well as the Associate Director at Max Super speciality Hospital in Delhi. Additionally, he holds significant roles as a visiting faculty member at Kasturba Medical College, Manipal, and as Course Director for prestigious institutions such as the Max Institute of Medical Education and Oreol Academy. With over 2,500 surgeons trained globally and more than 180 live operative workshops conducted, his impact spans across 21 countries.

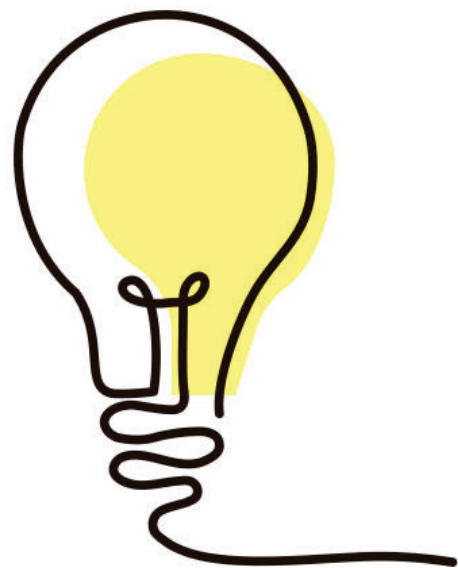

Dr. Goyal's expertise and contributions have earned him numerous accolades and recognition in both the medical and business communities. He was invited as an expert speaker by the World Health Organization in December 2023 to address representatives from 11 South East Asian nations on the prevention of surgical proctology diseases. He has also been honored as a TEDx speaker, sharing his insights on surgical precision with topics like **"Driving the blade – making a positive cut."** His work has been featured in leading publications such as India Today, Times of India, and Economic Times, where he has been recognized as one of the **"10 Most Powerful Leaders"** and awarded the **"Times Leading Entrepreneur Award"**.

Dr. Goyal's research and clinical innovations focus on resorbable mesh for hernia repair, diode laser in proctology, and the use of lifestyle modifications in disease prevention. His work has been published in journals such as the International Journal of Novel Research and Development, and his innovative approaches are transforming the landscape of modern

TRAINING OBJECTIVE

1. Understand **laser technology** basics
2. Identify common **anorectal conditions**
3. Learn **anorectal anatomy**
4. Familiarize with **laser types**
5. Master **laser setting** selection
6. Perform laser **hemorrhoidectomy**
7. Treat **anal fissures** with lasers
8. Learn **laser fistulotomy** techniques
9. Know laser surgery **indications**
10. Master **laser dissection** and vaporization
11. Proper patient **positioning techniques**
12. Conduct **preoperative assessments**
13. Postoperative care and **follow-up**
14. Identify and manage **complications**
15. Understand laser treatment **benefits**
16. Analyze **clinical outcomes** and comparisons
17. Review case **studies and evidence**
18. Use **diagnostic tools** effectively
19. Stay updated on **laser advances**
20. Develop **patient communication** skills

A FEW WORTHY TESTIMONIALS

I am using Laser for **more than two years**, but today i cleared lot of doubts thanks for oreol for giving this wonderful workshop..

Dr.S. Sendil Kumaran MS
Chairman & Managing Director
Sri Kumaran Hospital
Tirupur | Tamilnadu | **India**

I attended Oreol Academy's laser proctology training. In hemorrhoid treatments, pain is often a concern. I was seeking an easy, simple, and effective alternative, and I believe laser proctology provides a solution...

Dr. Ravishankar Bhat
Surgical Gastroenterologist
Apollo Hospital, Bangalore
Bangalore | Karnataka | **India**

After coming here, I have learned a lot, and every bit of my hard work was worth it. They, along with Sir, made it truly unforgettable for me...

Dr. Anwar Shahed
Assistant Professor
National Hospital Chattogram
Chittagong, **Bangladesh**

Thank you, Oreol, for this interesting workshop. I gained a lot of valuable information. I thoroughly enjoyed the sessions led by Mr. Neeraj Goyal. I believe this is a great opportunity to learn laser proctology...

Dr. Ali Hamad Mahmoud
Laparoscopy and Laser Surgeon
Maban Referral Hospital
Bunj, **South Sudan**

It was a wonderful experience. Oreol Academy is truly efficient. Dr. Neeraj Goyal—there are no words. He is a wonderful teacher. He made everything so easy for us.

Dr. Ravi Jain
Sr. General Lap & Laser Surgeon
Medigram Super Specialty Hospital
Saharanpur | Uttar Pradesh | **India**

The training was really benefits, for the newer techniques.

Prof. Dr. M P Sasi
Professor & HOD
Malabar Medical College
Calicut | Kerala | **India**

"It was a truly excellent demonstration of varicose vein cases. Everything was presented in a very systematic and organized manner..."

Dr. Narendra Bhaskarrao Chopde
General Lap & Laser Surgeon
Lata Mangeshkar Hospital
Nagpur | Maharashtra | **India**
